

## Pie

## Ice Cream Pie

One box of vanilla cookie wafers

One half gallon of ice cream

1 jar of hot fudge

nuts of your choice

Place vanilla cookie wafers in the bottom and sides of a pie pan.

Take half gallon Ice cream of your choice that goes with chocolate fudge

Take about half of ice cream and layer over cookies. Pour half of hot fudge

over ice cream. You may need to warm hot fudge very slightly to get it to

pour nicely. Then layer with rest of ice cream. Pour over with rest of hot

fudge. Chop about half to full cup of nuts of your choice and sprinkle over the top.

Freeze to set up about one hour. You do not need to cover in freezer.

When ready to serve take out for about 15 minutes to make it easier to cut.

This also tastes great with the combination of ice cream and caramel topping.
